Making a CD or a poster? Below are some photos that might work well as background textures. Contact me for info and full size jpegs. I'll be adding to this gallery over time, so check back.

If you click on the first pic below, you should be able to navigate through all the images on this page by clicking on the right side of the pic. If you click a pic farther down the page, the window seems to open near the top of the page, so you'll have to scroll up...
